# A PERSONAL MESSAGE

Welcome to TwinStar Entertainment – creators and developers of original and adapted stories for motion pictures and television. The company, named for twins *Ashley* and *Brittany Werdin*, serves as a special inspiration for our work.

My personal journey began as a young boy amongst neighboring film icons at our Malibu Colony home, a movie camera always close by. I became fascinated by movies while immersed inside a cavernous room surrounded by unfamiliar people for ninety magical moments. A venue where an audience collectively shares laughs, shed tears, expresses joy, or are scared out of their wits.

Whether seated in a theatre or nestled in front of a TV, our mantra is “*audiences deserve the highest possible entertainment experience.*” As such, we are committed to creating and developing stories that exceed audience expectations and with special appreciation for their valued time.

Thank you for your review.

Warm regards,

Russell Werdin

# ANIMATION

The image features a dark blue, starry background. At the bottom, there is a horizontal band of a colorful nebula with shades of blue, purple, and white. The word "ANIMATION" is written in a large, white, serif font across the center of the image.

# EDUCATIONAL

# Nature's Tales

Children learn through wildlife the  
importance of helping save the planet.

Super-star reporter **Terri Turtle** and her exuberant videographer **Ferris Ferrett** travel as a team to faraway lands, oceans, and jungles worldwide on Froggy's rocket-style lily pad. The team discovers and interviews all forms of wildlife, especially endangered species. The critical mission to protect the earth's ecosystem provides a forum for informing, engaging, and entertaining children ages 5 to 9 about their unique purpose on the planet.

Terri, a captivating and curious turtle, explores the wildlife realm by introducing fascinating characters for children to learn from who provide interesting facts and information regarding their lives and plight for survival.

Although Terry adores her rockstar camera guy, Ferris's comedic antics can strain her nerves and patience. While warnings of potential extinction are severe, wildlife teaches children to overcome challenges and share their joy in inspirational music and songs.

---

## EXPLORERS CLUB

Nature's Tales purpose and commitment is to connect children around the globe in secure parent, supervised zoom conversations to meet and communicate and plan contributions to wildlife protection and preservation. A motto and signature song, "*We are the voices of the future.*" Member photos of wildlife and other species earn points for gifts and merit badges on Nature Tales backpacks and Terri and Ferris outdoor equipment. Ultimate Nature Tales camps will allow children and families to join in outdoor excursions as they visit each other countries and form lifelong friendships; all united with a common cause to help preserve the planet—endeared wildlife in their natural homes.

## FORMAT

AI-supported 3-D eight-minute video shows and singalongs designed for mobile, tablet, and desktop applications.

KID'S  
COMEDY

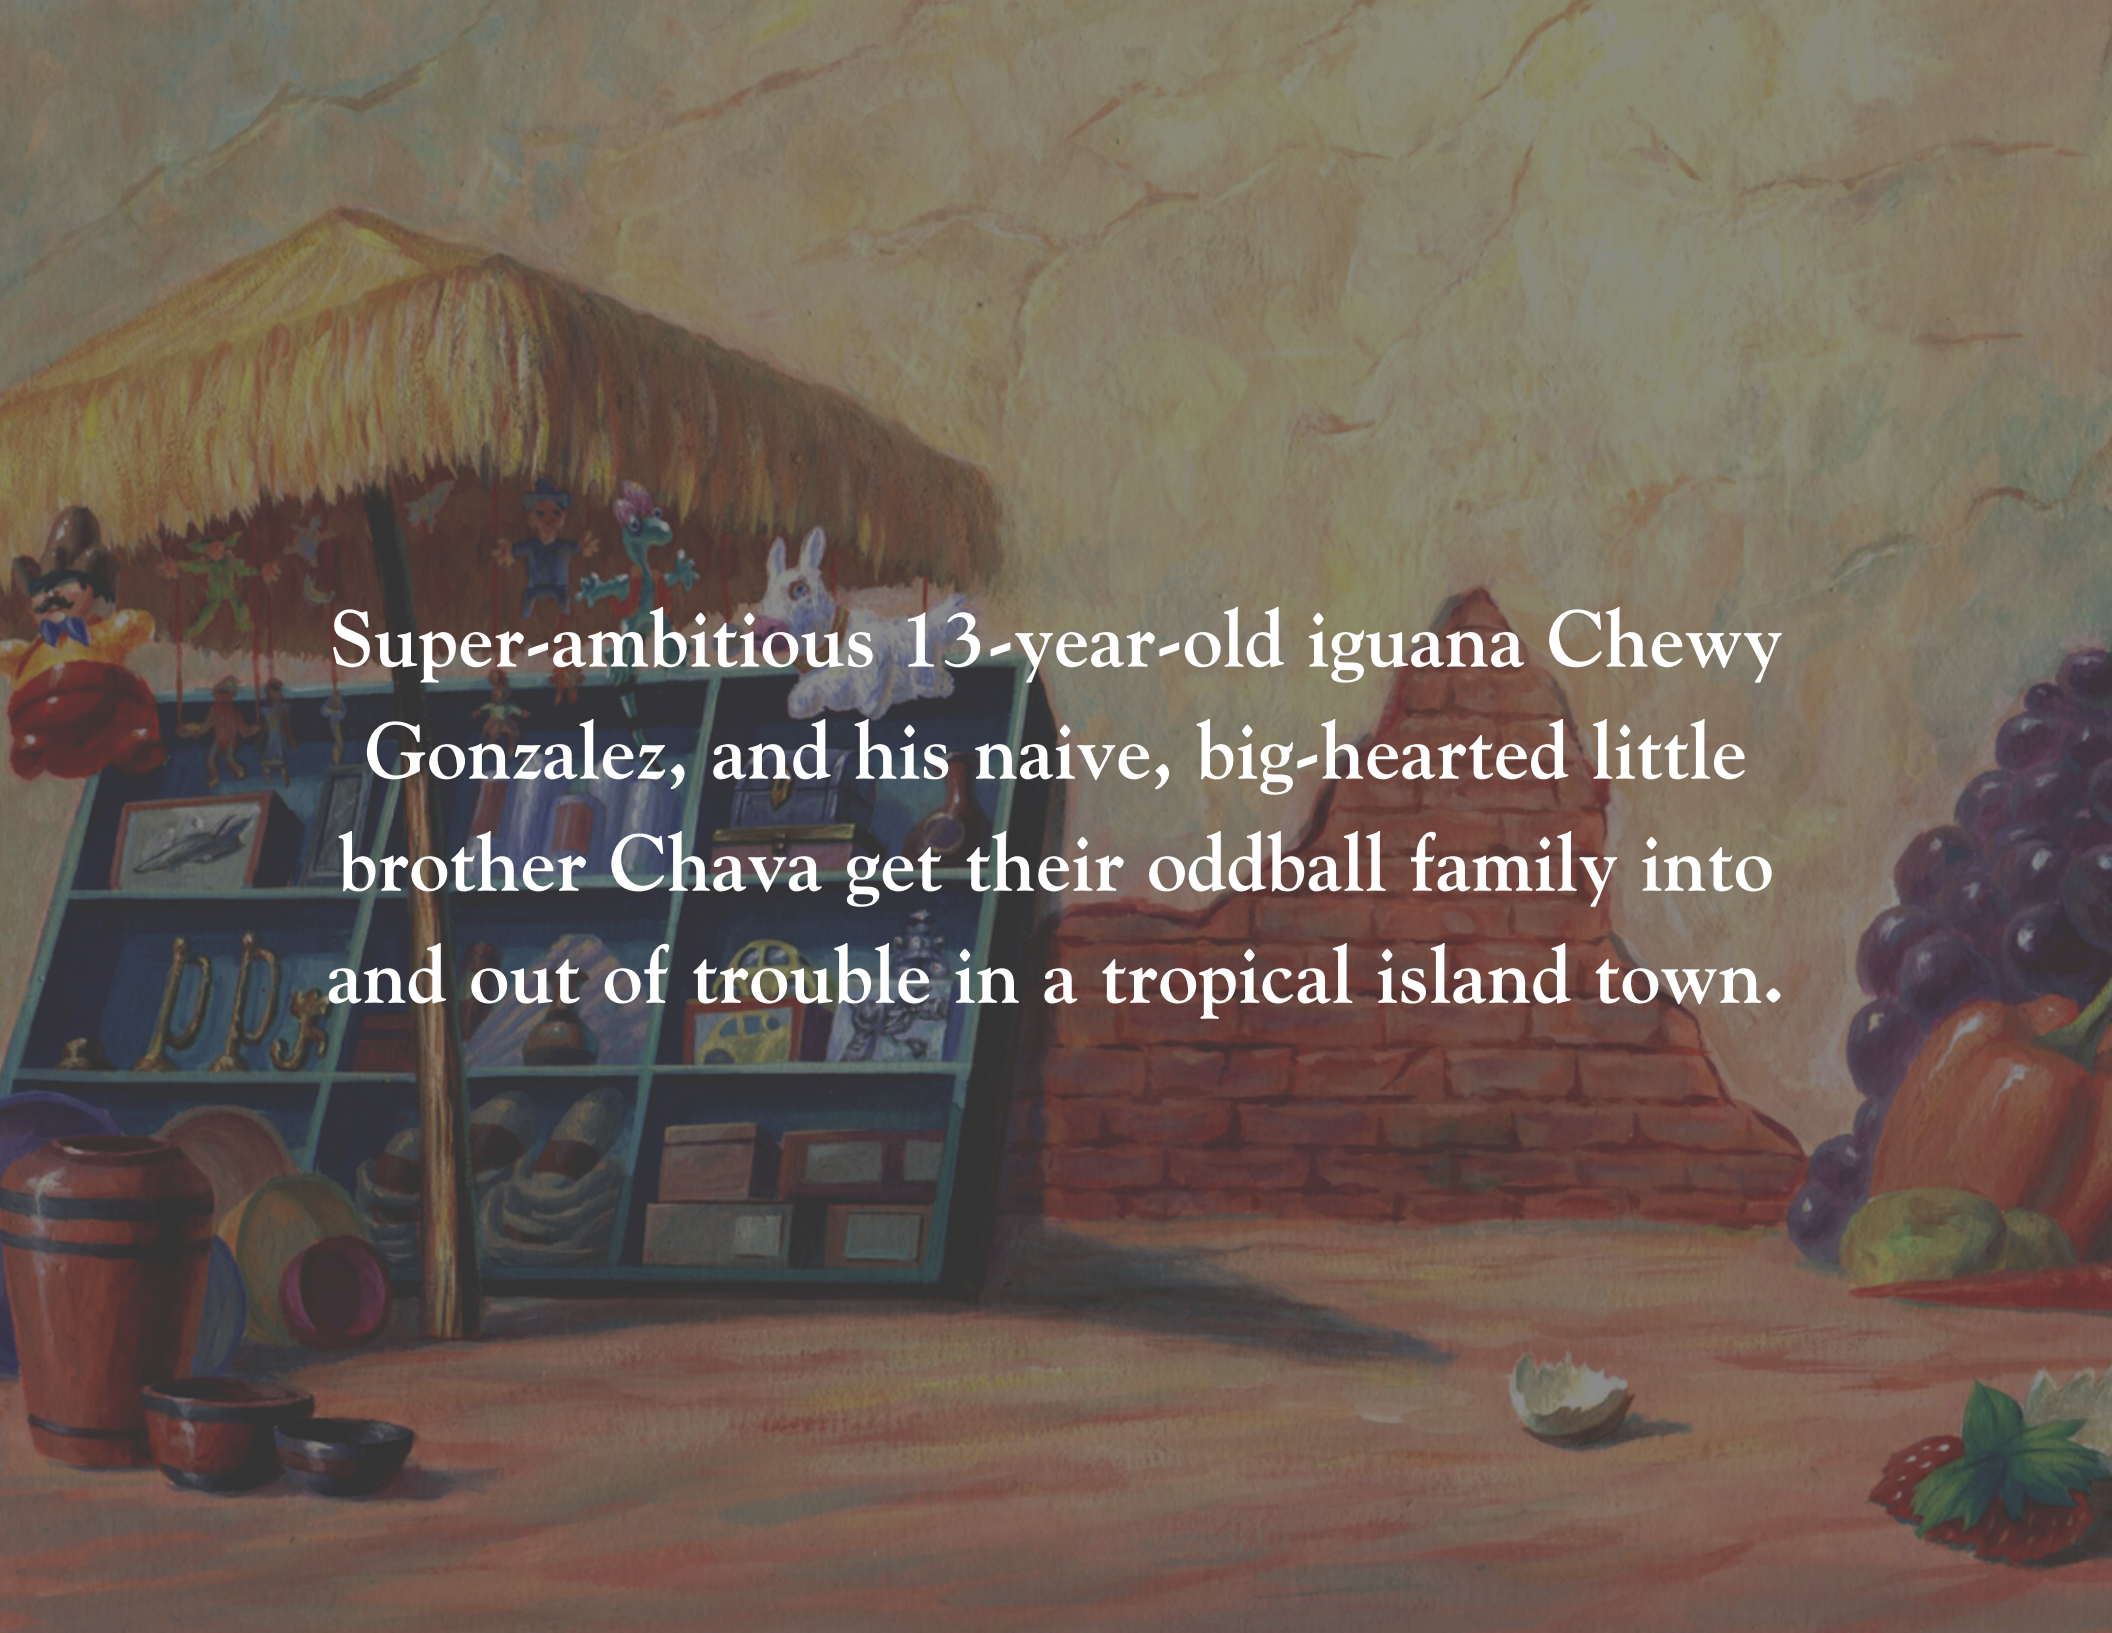

THE ADVENTURES OF

Chewy

& Chava

A painting of a tropical island town interior. On the left, a thatched hut with a yellow roof is visible. Below it, a blue wooden shelf holds various items, including a white donkey figurine, a blue toy car, and a framed picture. In the foreground, there are several brown ceramic pots and bowls. To the right, a brick oven is built into the wall. In the bottom right corner, there is a pile of purple grapes, a red bell pepper, and a strawberry. The background wall is a textured, light brown color.

Super-ambitious 13-year-old iguana Chewy Gonzalez, and his naive, big-hearted little brother Chava get their oddball family into and out of trouble in a tropical island town.

**Chewy Gonzalez** is a 13-year-old, small-town iguana with a big dream...to be rich and famous!

What's stopping him? A lack of any obvious talent...and a family who loves and needs him - especially his little brother **Chava**, a clumsy dope with a heart of gold!

Chewy & Chava (along with weird **Tio Gonzalo**, mercurial **Abuela Esther**, and their long-suffering single **Mama Flora**) get into heaps of tropical trouble on the mythical south-of-the-border island of El Tempo...(which isn't boring at all, despite what Chewy says.)

*"The Adventures of Chewy & Chava"* is an all-ages, character-driven comedy about living and loving the life you have. With goofy schemes, strange family, catchy songs, a big heart, and a much higher-than-usual number of exploding bananas!

## FORMAT

2-D animation for a 30-minute sitcom, each episode consisting of two shorts. The setting, the colors, and the drawing style are all unique in a cartoon landscape dominated by sterile retro-50's UPA styling.
